EDUCATION

University of Oriente, Santiago de Cuba, CU   Sep 2008 – Jun 2014
Bachelor of Science in Computer Science

PROFESSIONAL EXPERIENCE

Datamart SpA

Frontend Web Developer   Jun 2022 – Jul 2024
- Built and maintained several widget-type applications with React, Redux, TypeScript and Vite to handle banking operations such as credit applications, account creation, invoice management among others through API integration.
- Developed and maintained several micro-frontend applications with React, Redux, TypeScript and webpack that were part of the company's backoffice that included operations related to request history, order details, access logs, lead evaluation campaigns, etc.
- Wrote high-fidelity HTML y CSS code based on user interfaces designed in Figma with high fidelity and worked closely with designers and product owners to optimize the user experience and usability of the applications.

Prima-Ram

Full-stack Web Developer   Oct 2023 – Dec 2023
- Built a full-stack React application with NextJS and TypeScript that handled external API integration to process and render real-time data.
- Optimized the user experience in the overall application UI using best practices for web development, semantic HTML and well written CSS styles with TailwindCSS.

Dardeus Inc.

Frontend Web Developer   Jul 2021 – May 2022
- Built and deployed new features in the company's e-commerce application with React, NextJS and TypeScript.
- Transformed Figma designs to semantic HTML and CSS styles with TailwindCSS and worked with the designer to optimize the application user experience.
- Developed unit and integration tests with Jest and testing library and also optimized the code base an application load time.

360SmartConnect

Frontend Web Developer   Feb 2021 – Jun 2021
- Implemented, tested and maintained features with React and TypeScript for the data analysis sector in France.
- Transformed user interfaces designed in Figma with high quality and fidelity HTML and CSS code.
- Worked alongside the whole team to plan and architect new features.

Subzero Engineering

Frontend Web Developer   Sep 2020 – Dec 2020

- Built the company backoffice web application from the ground up with React, Bootstrap and Typescript including features like real-time data display, real-time notifications handling, form validation for data entering and more.
- Worked closely with the backend team to achieve a flawless REST API integration withing the frontend flow.

Soleil Dreams Solutions

Full-stack Web Developer   Jul 2020 – Aug 2020
- Developed a feature that integrates REST API service from HubSpot within company data processing software leveraging technologies like Express and MongoDB for the backend and React and Bootstrap for the frontend.

Self-employed

Full-stack Web Developer   Jan 2019 – Jun 2020
- Developed a Patient Administration System from the ground up with the help of technologies like .NET and MySQL for the backend and React , Bootstrap and Typescript for the frontend.
- Developed a Referral Management System for the health care sector from the ground up with the help of technologies like Express, MySQL and Typescript for the backend and React, Bootstrap and Typescript for the frontend.
- Worked with REST API integration, form validation, data sanitation, real-time data processing, real-time event dispatching and other technologies that helped me to guarantee a seamless service experience.

Ryder Systems

Frontend Web Developer   Oct 2019 – Dec 2019
- Developed the user interface of a Project Management System with the aid of technologies like React, Bootstrap, Typescript and CSS.
- Worked with features like REST API integration, form validation, load time optimization, cache handling and more.

PiBloc

Full-stack Web Developer   Aug 2018 – Dec 2018
Development of several custom projects for international clients using technologies such as React and Angular.
react, angular, jest, redux, bootstrap, html, css, javascript
